

Build Decision Trees from Scratch

BLAZON

Per pale Or and per fess Argent and Azure; in dexter three hurts in pale, in sinister chief two torteaux, in sinister base three plates.

SYMBOLISM

Fisher's irises, split twice: at petal length 2.45 cm, then petal width 1.75 cm. Every iris is a roundel, its species its tincture. Each heraldic division is an axis-aligned cut; the decision tree is the most heraldic algorithm there is.
