

Kernel Engineering

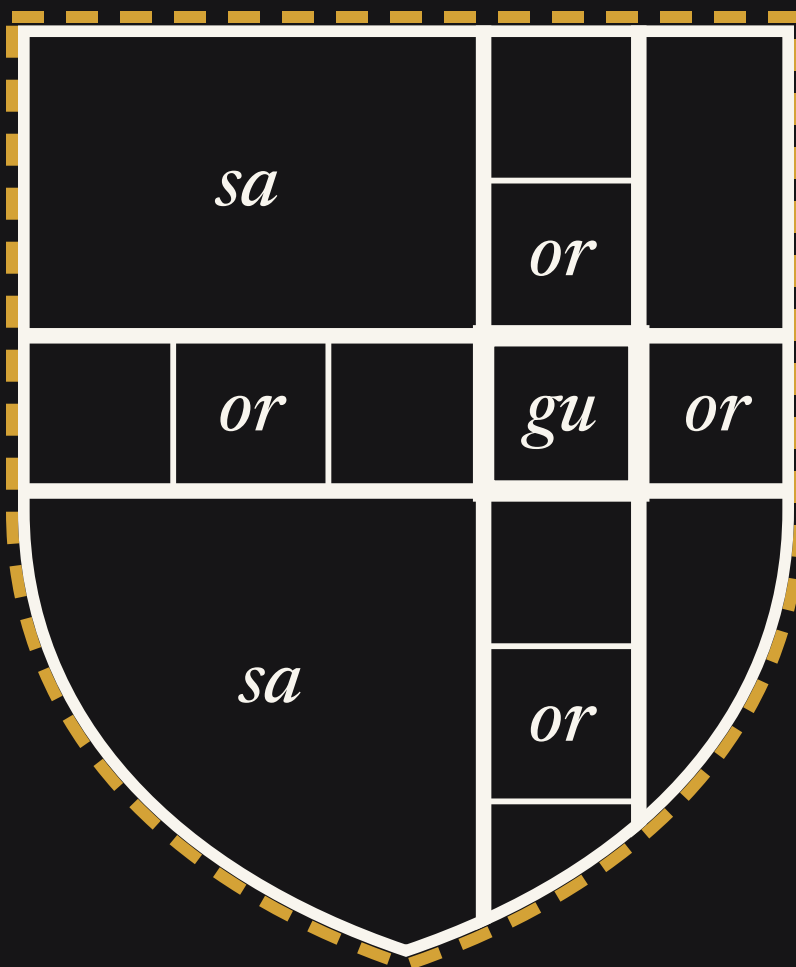

From silicon to speculative decoding – GPU kernels for modern LLMs.

BLAZON, IN TRICK

*Sable, a bar and a pallet
Or, each of tiles, their
crossing Gules.*

SYMBOLISM

A tiled matrix multiply: a row of tiles from A, a column from B, and where they cross, the one output tile being computed. Shown in trick – drafted, the tinctures written in – until the book is out.
